

Patient Vocabulary

You are the patient. Write the patient's part only of a dialogue between you and the doctor. Use these words below:

congestion	cough	joints	stomach ache
fever	stuffy nose	depression	feel
sore throat	tired/sluggish	headache	hurt
injure	pain	runny nose	vomiting/throwing up

Look at this example:

Doctor: (think: what is the doctor's first question? Maybe he says, "How do you feel?")

Patient: I do not feel well. I think I have a fever.

Doctor: (think: what is the doctor's next question? Maybe he asks you about your symptoms)

Patient: I feel hot, and I am tired all the time.

Doctor:

Patient:
